

ALL THAT I NEED

Written by : Nate Pyfer, Mason Porter, and Chris Crabb

Your voice it calls
I'm awake and listening
In those tired hours
When we should be sleeping
You're all that I hear and you're all that I need
You're all that I need
You're all that I need

You understand my ways
Even when I can't speak
Within a whispered word
And my secrets you keep
In your hush-full heart you're all that I need
You're all that I need
You're all that I need

You calm my brain and make it better
You're eyes the fire to heal my broken soul
And all my words are just to say
You're all that I need
You're all that I need
You're all that I need
You're all that I need

You know to break my code
When I'm locking you out
And my only ploy
Is to leave you without
My expected words
Just know that you're all that I need
You're all that I need
You're all that I need
You're all that I need

You calm my mind and make it better
You're eyes the fire to heal my broken soul
And all my words are just to say
You're all that I need

You calm my mind and make it better
You're eyes the fire to heal my broken soul
You're the patient one
You're all that I need
You're all that I need
You're all that I need
You're all that I need
You're all that I need
