

I FALL HARD

Written by : Chris Crabb and Jesse Hart Williams

I've been lonely
Been lonely for some time
Got one and only
One and only on my mind

And I can't help it that I see your face in the dark of
night
And I can't help it that the way you move has got me
so alive
And there is something that I think you ought to
know by now
So you won't let me down
You won't let me down

When I fall
I fall hard
And when I love
I love hard
And I know that you would never do that to me
Break my heart you know it just might kill me
Lower me down into my burial ground
When I fall
In love
I fall hard
I fall hard

It starts out slowly
But it's wild like a desire
And when you get so close to me
It burns like fire

And I can't help it that I see your face in the dark of
night
And I can't help it that the way you move has got me
so alive
And there is something that I think you ought to
know by now
So you won't let me down
You won't let me down

When I fall
I Fall Hard
And When I love
I love hard
And I know that you would never do that to me
Break my heart you know it just might kill me
Lower me down into my burial ground

When I fall
In love
I fall hard
I fall hard

Do you want to stay together
I'm trying to fight the end
Do you want to stay together
I'm trying to fight the end

When I fall
I Fall Hard
And When I love
I love hard
And I know that you would never do that to me
Break my heart you know it just might kill me
Lower me down into my burial ground
When I fall
In love
I fall hard
I fall hard

I fall hard
I fall hard
I fall hard
I fall hard
